## Fibre Optic Splice Closure C.05.JC-D.306

Joint closures are a range of products primarily used for joining cables. Joints in cables are a practical reality with the increase in distances that data needs to be transmitted. The primary function of a fiber optic joint closure is to protect the fiber joints from any physical damage.

Webb joint closures are made of high corrosion resistant polycarbonate material with heavy duty IP 68 delivering synthetic gaskets for total ingress protection. Our production treatments make our units UV resistant and waterproof. Every cable entry has high quality cable sealing plugs to maintain IP 68 ratings.

### Features

- Protection for dome-end splice with mechanical seal, recyclable and suitable for re-entry
- Can be utilized for notched, closed & rigid sheath platforms
- Suitable for the entire range of fibre optic cables
- Inclusive of sheath conservation and central strength member fasten feature
- Corrugated closure and light-weight plastic delivers robustness and resistance to chemical and UV degradation.
- Requires only base level usage of tools during installation & re-entry
- Inclusive of the entire range of hardware & flash test option is available for closures
- Protection category: IP68
- RoHS compliance

### Applications
