Fibre Optic Splice Closure C.05.JC-D.319

Joint closures are a range of products primarily used for joining cables. Joints in cables are a practical reality with the increase in distances that data needs to be transmitted. The primary function of a fiber optic joint closure is to protect the fiber joints from any physical damage.

Webb joint closures are made of high corrosion resistant polycarbonate material with heavy duty IP 68 delivering synthetic gaskets for total ingress protection. Our production treatments make our units UV resistant and waterproof. Every cable entry has high quality cable sealing plugs to maintain IP 68 ratings.

Features

- Can be utilized for notched, closed & rigid sheath platforms
- Suitable for the entire range of fibre optic cables
