MPO Patch Panel

MPO panels are purchasable in both fixed and sliding format. The clear high-density lightweight cassettes are fully compatible and available pre-installed with any combination of fibre types and connectors. The storing capacity of the chases is up to 4 cassettes in a 1U space.

Both panels are of lightweight aluminium construction. The fixed panel provides a simple economic solution whereas the sliding panel delivers more of a complete solution including fibre management, a swift release fold down eye protection plate and sliding rails for quick user-friendly maintenance.

Both chassis deliver up to 96LC connections or 48SC connections in a 1U housing.

*** Also available as a 3U LGX chassis with front cable management***
